How to update firmware using a UART connection.

100+ Years of Performance, Innovation, Commitment and Knowledge

Step 1

Shut the power off. The indoor unit will be powered through your USB cord. You cannot preform a UART firmware upgrade with the power on.

Step 2

Turn the Target switch to the off position on your TUT tool and plug the ribbon cable into the TUT tool.

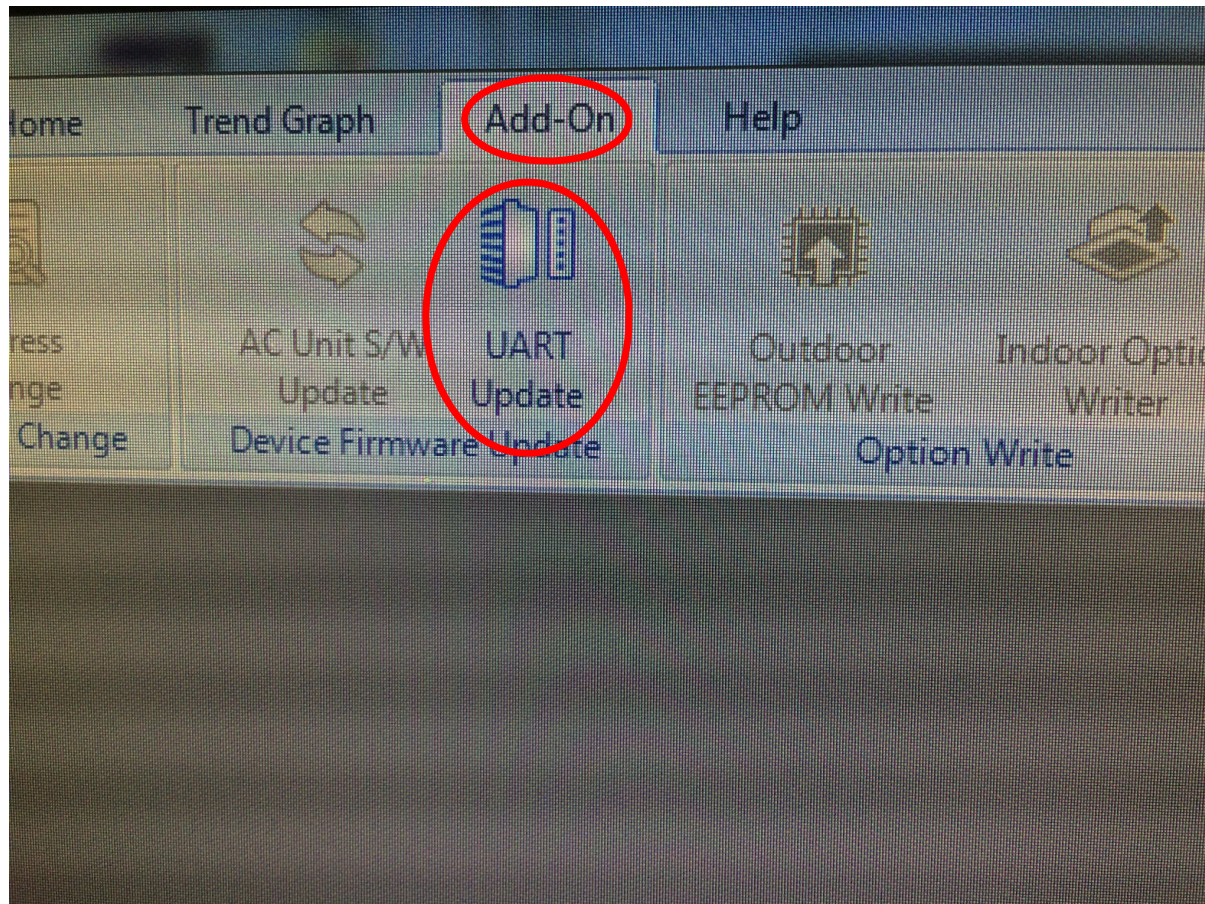

Step 3

Connect the other end of the ribbon cable to the download port on the indoor unit.
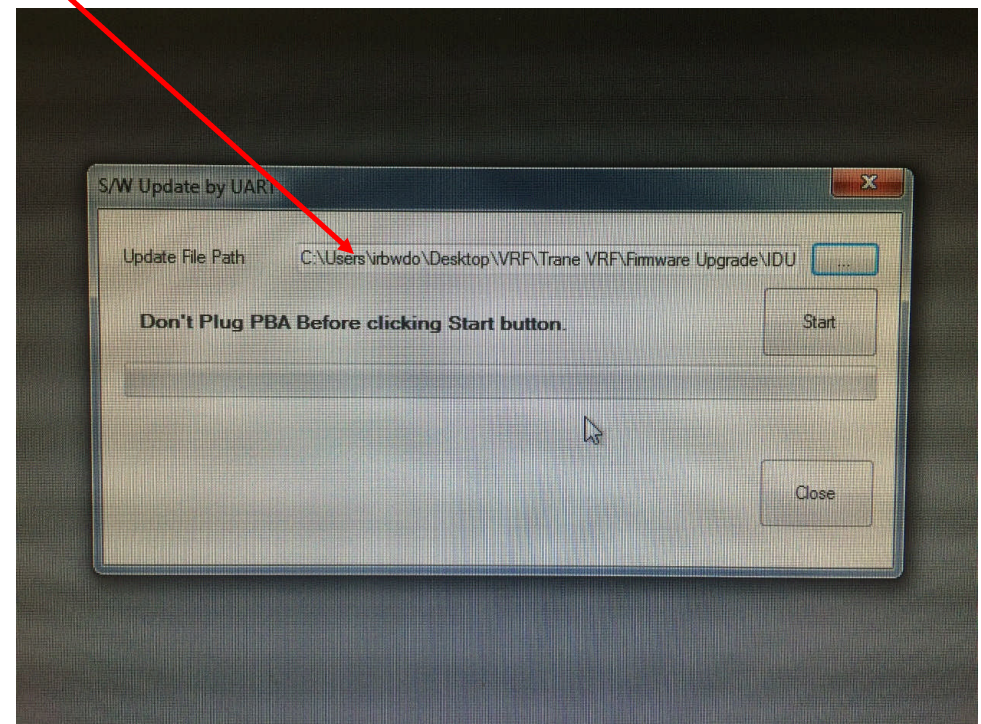

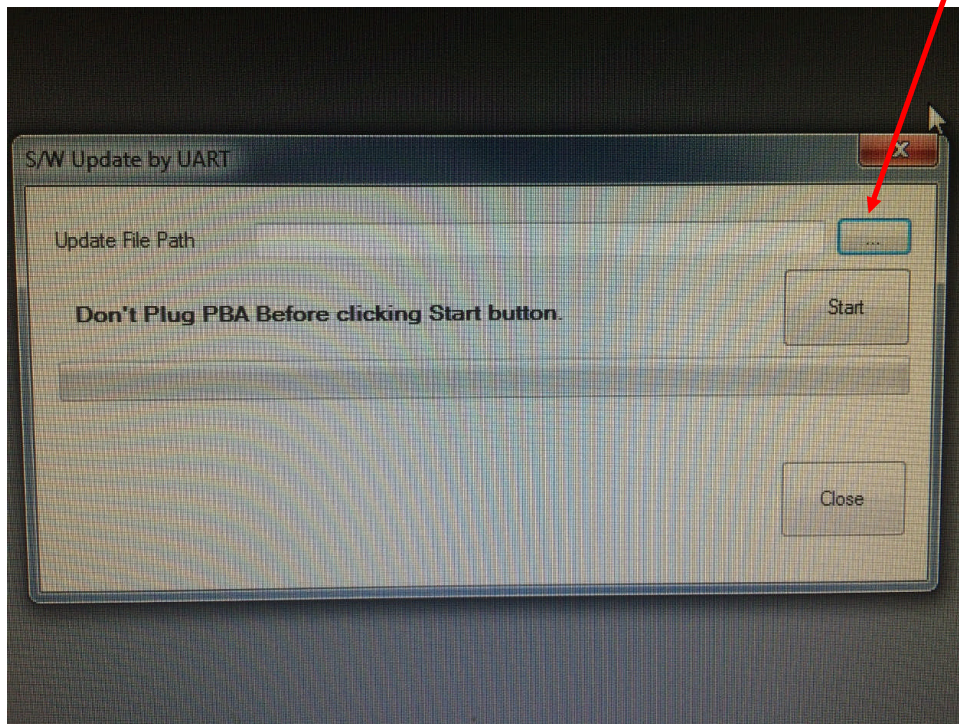

UART

Step 4

Make sure your TUT tool is plugged into your laptop. Verify that you have selected the correct serial port. Click on UART Update under the add-on tab.
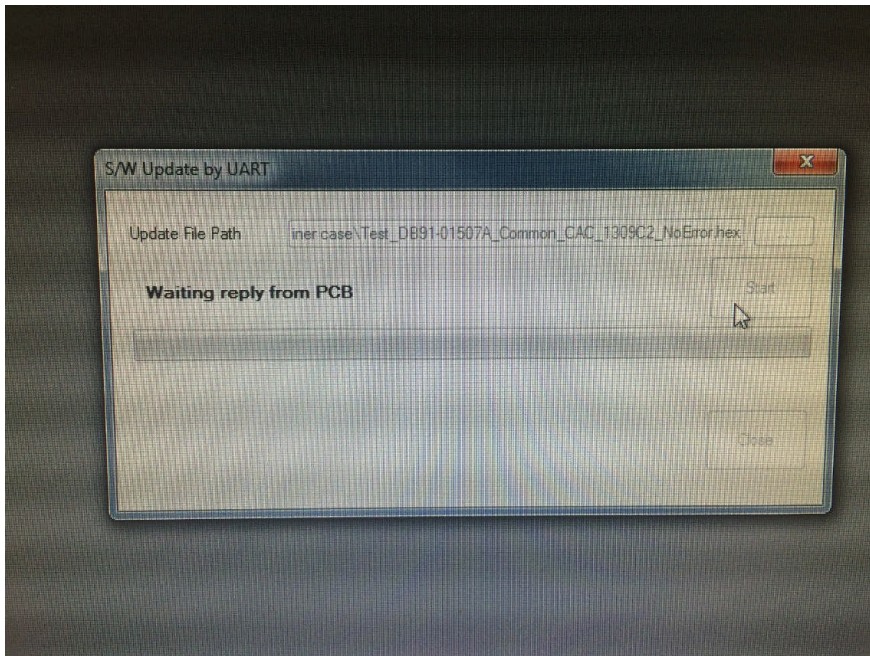

UART

Step 5

Navigate to the .HEX file

UART

Step 6

Step 7

Click Start

Turn the target switch on.

UART

Step 8

Click Start

Wait for it to say download successful
